Has the document been shared with the state or CSD yet? I believe we have a FOIA and are planning to release it as a responsive document.

Pat – Because the report mentions CSD, I think we should share it with them before it gets posted, as well as with WDNR. Do you have any objections?

Linda – attached is our final document from the Juneau County investigation. I assume that you would like share with the state prior to posting to the web? I understand that we have at least one FOIA's in house for which this would be responsive. Once I hear from you, we will send on for posting.

FYI - Posting things on the web has been very helpful to minimize the burden of FOIA requests. EPA is moving to require posting of all inspection reports on the web in the near future.
